Number of PDUs and topics:

3 in Insurance of persons

What will the Advisor learn by taking this course?

Canada's financial services sector grew 28% in the last decade, with a 10.5% jump in employment, says a report from the Conference Board of Canada.

Financial services directly accounted for close to 810,000 jobs and 7.2% of Canada's GDP in 2016, the report also says. In fact, the sector has been Canada's largest and fastest-growing source of services exports, accounting for 48% of Canada's outward foreign direct investment in 2016.

What's more, the sector generated a combined \$18.1 billion in revenues for federal, provincial and municipal governments in 2016.

Financial institutions play a vital role in supporting Canada's small and medium enterprises (SMEs), from raising capital to evaluating risk, the report says. SMEs make up 99.7% of Canadian businesses, and they rely on financial institutions for services ranging from banking and insurance to expanding into new markets and managing risks.

It is imperative for advisors to understand the markets that they work in. When they do,

they will be in a better position to offer their clients and prospects the service that they require and will appreciate.

This course will provide that education and understanding on the financial services industry in Canada.

This course covers:

- The financial services industry in Canada
- The 3 major types and 6 subcategories of financial institutions in Canada
- Chartered banks, Life insurance companies, General insurance companies, Investment Dealers, Credit unions and caisses populaires and Trust companies will be looked at
